# RUNNER 2

# Design
# Control
# Experience

The Runner2 Series is the skillful combination of engineering excellence and technological innovation.

The Runner2 embodies the qualities that are integral to every Crow Panel and offers an unrivalled level of security. The outstanding capabilities of this system are expressed aesthetically by a flowing design perfectly combining light, lines and curves.

## Runner2 Engine

At the heart of every great panel is a great engine. The Runner2 engine is based on the hybrid panel concept of the proven Runner Series. The Runner2 features Two Way communication, optional integrated GSM/GPRS backup module and TCP/IP support, all in one. The Runner2 is built for performance and accuracy, providing complete harmony between the user and the panel while integrating the latest technology into a easy to use, yet highly sophisticated security solution.

## Runner2 Keypads

The aesthetic look of the keypads is carefully considered, creating a truly harmonious design. The Runner2 keypad line conceal real and everyday usability, sophisticated electronics and graphic interface that deliver both power and user friendliness.

**CROW**
The Crow Group

# Powerful Control panel with exceptional OLED display Keypad, two way wireless technology, TCP/IP and GSM/GPRS Support

- Up to 16 wireless and hardwired zones
- Two way wireless transceiver and two way accessories
- GSM/GPRS modem with CID, text messaging and remote control features
- Access control and home automation features
